

# QUALITY WEED WIPER CARTS

You can cover a lot of ground with the Quality Weed Wiper Cart. This well designed, heavy-duty unit can be pulled behind an ATV, lawn tractor, or conventional farm tractor. The frames are made of 2" x 2" or 1 1/2" x 1 1/2" tubing and are reinforced at all critical points. The wings on the 21' and larger carts are free to float up and down, closely following the ground contour and fold easily for transport. Minor height adjustment is quickly and easily made at the wick holders. Major adjustment is made at the wheels. All carts are equipped with heavy-duty, all-welded wheels with 1/4" spokes; precision ground, sealed ball bearings; 4-ply tires and puncture resistant tubes. The wheels are adjustable to fit whatever row width you desire.

We use the patented Speidel Applicator, which is a perforated plastic pipe reservoir that is wrapped in canvas. It is valve-controlled for a faster reaction time and uses less herbicide than other applicators. It will give you more economical and effective control of troublesome plants like milkweed, dogbane, Johnson grass, rye and corn.

For best results, weeds should be actively growing. Type of weeds, weed maturity, growing conditions, and amount of wiping surface wetness affects mixing rate.

Standard size carts are: 10'6", 21', 30'6", 42'6" and 45'6".

Individual Wicks Available In Sizes:

- 6'9"
- 8'
- 9'6"
- 10'6"
